

## Phantom® Minimally Invasive Surgery (MIS) Lapidus System

# PHANTOM® | Minimally Invasive Surgery (MIS) Lapidus System

The Phantom® Minimally Invasive Surgery (MIS) Lapidus system was designed to provide surgeons guided instrumentation to aid in a minimally invasive joint preparation technique for the Lapidus Arthrodesis procedure

## Features

- ▶ The Burr Guide and Paddle allow the surgeon to locate the joint such that the orientation is aligned properly prior to burring (Figure 1)
- ▶ Ø3.0 mm Shannon-Style Burr designed to avoid impingement of surrounding soft tissue (Figure 2)

Figure 1

Figure 2

Paddle

- ▶ Paddle built to be inserted into joint space to support proper orientation of the Burr Guide

Burr Guide

- ▶ The Burr Guide is inserted over the Paddle then temporarily fixated
- ▶ Guide is designed to allow a Shannon-Style Burr to sweep through entirety of the joint, once the paddle is removed
- ▶ Allows for controlled cartilage removal through a minimal (8 mm–10 mm) vertical incision

Shannon-Style Burr

## COMPLIMENTARY PRODUCTS

### Phantom® Intramedullary Nail

- ▶ Developed to provide a structurally sound construct that minimizes hardware prominence for the Lapidus Arthrodesis procedure
- ▶ The uniform force through the nail allows for a stable construct that is intended to promote primary healing throughout the fusion site<sup>1</sup>
- ▶ Helps preserve periosteum due to the intramedullary construct
- ▶ The Phantom® Nail may be inserted with a minimum of three stab incisions

| Diameter  | Ø3.5 mm  |  |
| Lengths   | 10–46 mm (2 mm increments)   |  |
| Intended Use  | Inserts into the proximal holes of Phantom® Nail   |  |
|   | Inserts into the distal holes of Phantom® Nail   |  |

## INCLUDED INSTRUMENTATION

Curved Osteotome and Large Curette available in set to further support in preparation, de-rotation and intermetatarsal correction of the joint, as needed

## Phantom® Minimally Invasive Surgery (MIS) Lapidus System
